

Know your GVM, GCM and ATM ratings

GVM, GCM & Towing Upgrades

Gross Vehicle Mass (GVM)

Maximum allowable weight of the vehicle and all pay-load, including passengers, accessories, luggage and fuel.

↑
Ball Weight

Gross Trailer Mass (GTM)

Maximum allowable weight supported by the wheels of the van.

← Aggregate Trailer Mass (ATM) = GTM + Ball Weight →

Gross Combination Mass (GCM) = GVM + GTM

Gross Combination Mass (GCM) = Maximum allowable weight of car and trailer when connected. GCM is equal to GVM + GTM unless otherwise specified by the manufacturer. Note: The caravan's ball weight is now supported by the car and becomes part of the car's weight.
